

New WSFR eLearning Course Released

The Wildlife and Sport Fish Restoration (WSFR) Program training team is excited to announce the release of a new e-learning course titled The Grants Management Process. This course will be offered as a pre-requisite for all those who will participate in the Project Leader's (PLC) and Basic Grants Management (BGM) courses. This is the second WSFR e-learning course developed in cooperation with the National Conservation Training Center (NCTC) Division of Knowledge Resources and Technologies (KREATE).

The purpose of this e-learning course is for students to arrive at the PLC and BGM courses with basic knowledge of the WSFR Program and the Grants Management Process. This will allow more time in the instructor led portion of the courses to be devoted to the most significant subject matter.

This new on-line course incorporates a game board approach that takes learners on a journey through each life phase of a grant. The course is fun and engaging while accomplishing established learning objectives. A Certificate of Completion can be printed for all those who successfully complete the course. Certificates must be presented to the classroom instructor at the Project Leader's and Basic Grants Management Courses. We hope you will enjoy this new e-learning tool.
